REMARKS:
 This chart is based on the latest available information and is subject to change without notice.
 The soundings are in meters unless otherwise indicated.
 The magnetic variation is given in degrees and minutes of arc.
 The true bearing is obtained by adding the magnetic variation to the magnetic bearing.
 The true distance is obtained by multiplying the magnetic distance by the cosine of the magnetic variation.
 The true time is obtained by adding the magnetic time to the magnetic variation.
 The true position is obtained by adding the magnetic position to the magnetic variation.
